Hyland Hy-Box pickup charge

Please note we will be implementing a new **Hy-Box** pickup charge in 2014. When you receive a Hy-Box full of Hyland seed you will be charged a deposit of \$500, same as what has happened in the past years. When you are finished with the Hy-Box and it is picked up by CFC you will get a credit back of \$480 (\$500 less \$20 pickup charge) and also less any damage charges. Please remember this charge only applies to Hy-Boxes that are picked up on your farm by County Farm Centre. If you drop the empty Hy-Boxes off at any County Farm Centre you will not be charged the \$20.

Agronomy Corner

Now is the time to frost seed Red Clover, fitting an additional legume crop into the rotation. Remember double cut will give you more organic matter and nitrogen than single cut for a little extra cost. With an initial investment of Double Cut Red Clover seed you could get a nitrogen credit of 70 lbs off the following year's crop.

Agronomy Return Policy

A friendly reminder of our return policy: All returns must be made in resalable condition and within the posted timeframes.

Fuel Section

Spring is here! Thank-you to everyone for your patience through this long and cold Winter. If you are satisfied with your fuel service, we ask you tell a friend or relative about County Farm Centre. If for any reason you are unhappy with your service, please tell us by phone (613) 922-1308 or by email to tim@countyfarmcentre.com

Farmers, remember if you are not on automatic delivery, please check your tank so you are ready to go when the ground permits. Also, if you are not using Deselex Gold in your tank, please speak with us because you are missing out on the best diesel on the market.

Deselex[®] Gold

Power ♦ Efficiency ♦ Protection

- Provides up to 5.7% gain in fuel efficiency
- Starts engines faster
- Restores lost horsepower
- Cleans up dirty injectors
- Prevents internal injector deposits
- Extends fuel system life
- Improves fuel storage life
- Reduces risk of plugged filters
- Performs well with biodiesel

Deselex[®] Gold

Battle Now Against High SCC

As I write this, we have had a couple of warm days in a row (a nice break from the long winter). Lets' hope that Summer is just around the corner! With that I think of those long hot days. Perfect weather for increased somatic cell counts!

With that in mind, I am pleased to announce that we have something new in our nutritional toolbox to help combat this. Nutragen has been used in over 180,000 cows across North America and has helped lower the SCC from 4.7% to 15.5%!! See Figure 1 for details.

Figure 1
Change in Somatic Cell Count (SCC) for Herds Grouped by Initial SCC

The herds were grouped by SCC 250k or less, 251k-350k and 351k and higher. As you can see, Nutragen was able to reduce SCC in every group. I have personally seen this work on local herds. It's an amazing product which specializes in improving the cows' immune system. The challenge is we need to build the cows' immune system before she hits the milk line and continue to use this product throughout her lactation. If you are interested in reviewing the research or would like to see how this innovative product can work for you please let me know.
