PESTICIDE NUMBER UPDATE

If you have recently received a Grower Pesticide Number or have updated it in the last couple of years please call (613)476-9183 or e-mail Lindsay (lwilliams@countyfarmcentre.com) with your new pesticide number and/or expiry date. If you plan on buying pesticides in 2017 we MUST have your number on file.

- Crop inspection pest report, which can only be done by a professional pest advisor

Heads up to people in Prince Edward County... PEC is in Schedule 1, meaning after August 31, 2017 you are required to have a professional pest advisor complete the pest assessment report for your fields. However, pest assessment reports are valid for 12 months. If you're able to complete pest assessments in Spring of 2017 you will be able to purchase your 2018 seed with that pest assessment and not be required to have it completed by a professional pest advisor.

AGRONOMY CORNER

Seed deliveries will soon be starting. Please note **we cannot** ship your seed until all appropriate seed treatment paperwork is done and we have a copy. Please make this a priority so we can ensure timely seed delivery.

For the 2017 planting season you are required to have the following to plant Class 12 seed:

1. Have completed the Integrated Pest Management (IPM) course. This is offered for free until April 2017.
2. A completed pest assessment report.
3. A signed IPM Declaration Form.
4. If you plant non-Class 12 treated seed (not treated, fungicide only or non-neonic insecticide) there is no required paperwork.

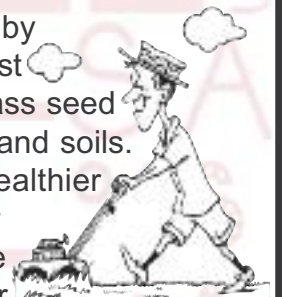

Please note a pest assessment report can either be:

- Soil inspection pest report, which can only be done by an IPM-trained grower

Please give us a call if you need help filling out the paperwork.

STORE NEWS

The warm weather stopped by to remind us that spring is just around the corner. Our grass seed is out along with fertilizers and soils. If you want a greener, healthier lawn, consider using a slow release fertilizer. The nutrients are released over several weeks to continually feed the plants. Application is cost-effective and can be performed with any broadcast or drop spreader.

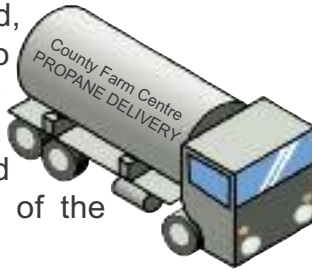

Don't forget to plan your **vegetable and/or flower garden**. County Farm Centre has what you need to get planting and keep growing. Stop in and see us!

ENERGY DEPARTMENT

As you may have heard, there are many benefits to using propane as a home heat source. The efficient output, cost savings and convenience are just part of the picture.

County Farm Centre provides to you - our customer:

- A locally owned business and employees involved with the local community
