## AGRONOMY CORNER

### Key features of maximizing your wheat yield.

- I. Certified seed
- II. Timely planting
- III. Seeding rate
- IV. Seed depth
- V. Soil testing and balanced fertility
- VI. Balancing sulphur application with nitrogen in the spring
- VII. Fall weed control
- VIII. Spring follow-up

## Pesticide Licencing

Please help us update our Pesticide License database. If you have updated your license recently please let us know your new number and expiry date. BY LAW WE CANNOT SELL YOU REGISTERED PESTICIDES WITHOUT YOUR NUMBER AT THE TIME OF PURCHASE. Also note, we do NOT get an updated list of license expiries when you update your license, that is your responsibility.

You can call any of our locations or e-mail it to  
[lwilliams@countyfarmcentre.com](mailto:lwilliams@countyfarmcentre.com).

## Now's the time for...

### GPS Soil Sampling

County Farm Centre offers GPS soil sampling on 1 acre, 2.5 acres and 5 acre grids, as well as boundary mapping. Soil sampling is the first step in Precision Ag and leads to pinpointing problem areas, site-specific recommendations and variable rate application.

*Be sure to stop in at one our locations to get your name on the soil sample list!!*

## ANIMAL NUTRITION

**The Straw Boss**  
Premium Straw Processors

A new Product here at County Farm Centre - Straw Boss - is a high quality, chopped, dust-extracted, and bagged straw. It has a variety of uses from bedding for small and large animals, compost, over-wintering gardens, and a source of effective fiber for ruminants.

The benefits of this product are seen as a result of the elimination of dust and the quality of the product. Dust can carry mold spores, bacteria, viruses, etc. leading to respiratory issues among workers and animals as well as increased maintenance costs of your facility. The extraction and elimination of the dust also creates a more absorbent product than non-processed straw or wood shavings, helping to reduce the presence of ammonia and increasing the quality of air. By eliminating the dust, you and your animals are provided with a safer, cleaner, and more comfortable environment.

Once the product has fulfilled its purpose it is easily compostable, breaking down quicker than wood shavings (decreasing the size of manure piles). Straw also does not tie up nitrogen as it biodegrades, making it a good source of organics for both farmers and gardeners alike who want to recycle it back onto their land.

When considering Straw Boss' potential as a source of effective fiber for ruminants, its quality and chop length make it an easy addition to a TMR ration or as an additive in a grain fed veal operation to help stimulate the rumen and keep the animals healthy and working optimally.

Testimonials from current users:

"Bags are easier to handle with less mess · Breaks down better for composting · Horses are laying down more, very comfortable · Better working conditions with no dust · Less maintenance around barn with no dust · Our horses are breathing better with no dust around!"

Straw Boss is a family owned and operated business based in Mt. Elgin, Ontario who is proud to use premium Canadian wheat in all their products. We are working with them and are currently offering both a fine and coarse cut option of the bagged straw and look forward to helping you meet your needs or answer any questions.

Happy Farming!
